Dear parent

**RAG Rating Information - Maths**

Following the mock examination in maths last December, we have produced an analysis for each student which highlights to them which topics they need to learn and practice. The analysis also informs them about which Maths Watch clips they need to use to help them to practise the topic. They have also been given additional exam style questions based on these clips to further practise and aid their revision.

Your daughter/son has been issued with the analysis. Each topic is highlighted in red, amber or green. Topics highlighted in green are those which students understand well, those highlighted in amber need some further practise and those highlighted in red need to be learnt.

In addition to the work covered in class we expect students to be spending between 30 minutes and an hour at home each day revising for their maths GCSE. We hold maths intervention on a Thursday after school from 4 p.m. until 5 p.m.

Please ask your son or daughter to show you the analysis so that you have a better understanding of what they need to focus on between now and the examinations in May and June.

Please contact us at school if you require an additional information about your daughter's or son's progress in maths and how best to support them.

Yours sincerely

A handwritten signature in blue ink that reads "R Umerah".
